

# T8 4 TUBE HORTICULTURAL FIXTURE

## T8 4 TUBE HORTICULTURAL FIXTURE

The Active Grow T8 Horticultural Fixture comes prewired and ready for use with Active Grow T8 HO Ballast Bypass Lamps. The fixture is powered directly off of 120-277V universal voltage so there is no buzzing, flickering or longevity issues associated with ballasts. The fixture can be hung in multiple configurations and its reflective surface guarantees optimal light uniformity. For use in various home or commercial growing applications.

### Save Energy

No ballasts means you are saving a lot of energy and amperage costs. Without a hot ballast running the fixture also helps save on heat maintenance costs.

### Pure Uninterrupted Plant Lighting

No ballasts means no flickering of lamps or buzzing of electricity guaranteeing pure photon output for your plants.

### Longer Lasting

No ballasts means an extra long lifetime with little to no maintenance costs for years of use.

### Rebates Available

When using Active Grow T8 LED lamps the T8 fixture is able to receive large utility rebates for commercial projects.
